

## What start-ups are saying...

“When my start-up needed something more than my CTO soldering in his basement, we reached out to Urtech, to guide us through our product prototyping, with deliveries to our door!

Then, they were the credible partner to support us through our industry certifications and scale and to get us to market with confidence.”

“Through UrStart, Urtech became my first customer to help prove out my design and gain credibility!”

Burlington, ON L7N 3P3

## Why Launch Hardware Accelerator?

We know that there is a gap in Ontario for start-up companies focused on hardware development and commercialization.

Unlike software start-ups, companies focused on hardware development have different requirements to mentorship, network, and services.

At Urtech Manufacturing, we have dedicated **UrStart** - “**Hardware Accelerator**” for hardware start-up companies to enable local Canadian hardware ventures to launch their products from prototype, to production, and to shipping.

**UrStart** - Hardware Accelerator

## Hardware Accelerator Brings You...

- Connection to a network of experts across the hardware ecosystem.
- Office and meeting space, work benches.
- Access to events and event space for a startup's customer or investor events.

## More Importantly...

- Companies that will benefit most from utilizing this space and service will be at the stage of the prototype build, with a product design and assessed market opportunity.
- By entering into the Hardware Accelerator space, they will be able to connect with other start-ups at different phases of their product launch cycle.
- Connecting and sharing experiences will be encouraged through our open common area concept.
- We offer our full network of services and expertise to support the development of their product.
- With factories in both Ontario and Florida, offshore risk is minimized and we offer Made-in-Canada and Made-in-USA branding.

## UrStart Membership

**UrStart** is the Hardware Accelerator near you that:

- Understands you and your needs as a startup, we've been there!
- Connects you with the Experts and Resources you need.
- Provides access to work benches, office space, meeting rooms and event space.
- Professionally positions you with credibility for customers/investors.
- Provides you the real-world feedback and guidance you need.
